

PropVest

Company Structure & Operations Guide

Everything you need to run PropVest as a Nigerian company

CONFIDENTIAL — Internal Document

April 2026

PropVest — Company Structure & Operations Guide

Everything you need to know about building, running, and scaling PropVest as a Nigerian company. From registration to hiring to daily operations.

PART 1: LEGAL FOUNDATION

Do these BEFORE you launch. No shortcuts.

1.1 Company Registration (CAC)

Register a **Private Limited Liability Company (Ltd)** at the Corporate Affairs Commission. Not a business name — a proper limited company. This is non-negotiable because:

- You need to open corporate bank accounts
- You need to sign legal contracts with developers and investors
- Investors and developer partners won't take a business name seriously
- It limits your personal liability — if the company has issues, your personal assets are protected

What you need:

- Company name: PropVest Technologies Ltd (or similar — check availability on CAC portal)
- Minimum 2 directors (you + co-founder)
- Minimum 2 shareholders (same people is fine)
- Share capital: N1,000,000 minimum recommended
- Registered office address in Nigeria
- Memorandum and Articles of Association (MEMART)

Cost: N100,000 - N200,000 (through a lawyer or accredited CAC agent)

Timeline: 2-4 weeks

What you get:

- RC Number (Registration Certificate number)
- Certificate of Incorporation
- MEMART (company constitution)
- Share certificates
- Form CAC 1.1 (company details)

1.2 Tax Registration (FIRS)

After CAC registration, register with the Federal Inland Revenue Service.

What you need:

- Tax Identification Number (TIN) — register at nearest FIRS office or online
- VAT registration — mandatory if your turnover exceeds N25 million/year (you will hit this)

Taxes you will pay:

Tax	Rate	When
Company Income Tax (CIT)	0% first 2 years (small company relief) then 20%	Annual filing
VAT	7.5% on your platform fees	Monthly remittance
Withholding Tax (WHT)	10% on rent (developer handles)	When applicable
PAYE	Progressive (7-24%)	Monthly for employees
Education Tax	2% of assessable profit	Annual (when profit exceeds N1M)

Important: Small companies (turnover under N25M) pay 0% CIT for the first 2 years. You likely qualify at launch.

Cost: Free to register. Compliance costs N50,000-100,000/year (accountant fees).

1.3 SCUML Registration

Special Control Unit against Money Laundering. **Mandatory** for any business dealing with financial transactions in Nigeria. This is under the EFCC/CBN framework.

What you need:

- Fill SCUML form at any designated bank
- Provide CAC documents

- Details of directors

Cost: Free

Timeline: 1-2 weeks

Why it matters: Without SCUML, banks may refuse to open accounts for you or freeze your accounts. Don't skip this.

1.4 SEC Nigeria Considerations

This is the big one. The Securities and Exchange Commission regulates collective investment schemes in Nigeria. Fractional property investment COULD fall under their jurisdiction.

The honest situation:

- There is no specific regulation for fractional real estate in Nigeria yet
- SEC regulates REITs (Real Estate Investment Trusts) but PropVest is not a REIT
- SEC regulates crowdfunding through the "Rules on Crowdfunding" (2021) — this is closest to what PropVest does
- The SEC crowdfunding rules cover "investment crowdfunding" and require registration

What to do:

1. Consult a securities lawyer BEFORE launch (budget N200,000-500,000 for this)
2. Consider registering as a Crowdfunding Portal with SEC
3. Alternatively, structure each property investment as a private placement (limited to qualified investors) to potentially avoid SEC registration initially
4. Monitor regulatory developments — Nigeria is actively developing proptech regulations

Do NOT ignore this. Many Nigerian fintechs launched without proper licensing and later faced shutdowns. Better to engage SEC early even if it costs money and time.

1.5 NDPA Compliance (Data Protection)

The Nigeria Data Protection Act (2023) replaced the old NDPR. Since you're collecting BVN, NIN, bank details, and personal information, you MUST comply.

Requirements:

- Appoint a Data Protection Officer (can be you initially)
- Create a Privacy Policy (publish on your app/website)
- Get explicit consent before collecting personal data
- Store data securely (encrypted, access-controlled)
- File an annual Data Protection Audit with NDPC (Nigeria Data Protection Commission)

- Notify NDPC within 72 hours of any data breach

Cost: First audit N100,000-300,000 through a licensed Data Protection Compliance Organization (DPCO)

1.6 Payment Routing Setup (Per Property)

Instead of creating a separate SPV company for each property (expensive, slow, N100K-200K each), PropVest uses **Paystack Sub-accounts with Split Payments** to route investor money directly to the developer.

Per property listing you need:

- Developer provides their verified bank account details
- PropVest creates a Paystack Sub-account for the developer (one-time, via API)
- Configure split ratio: 97% to developer, 3% to PropVest (platform fee)
- Generate a DVA (Dedicated Virtual Account) linked to this sub-account
- Sign a Developer Partnership Agreement (legal contract covering ownership rights, payout obligations, and investor protections)

How it works:

- Investor pays N100,000 → DVA for the property
- Paystack auto-splits: N97,000 → developer's bank account, N3,000 → PropVest account
- Developer sees the money in their own bank app immediately
- PropVest never holds developer's money — trust is built in

Cost per property: N0 (Paystack sub-account creation is free via API)

Timeline: Instant (API call)

Legal protection without SPV:

- Investment Agreement between investor and PropVest — defines unit ownership, return rights, and exit mechanisms
- Developer Partnership Agreement — developer's obligation to manage property, report rent, and honour investor payouts
- Property lien or charge registered at land registry (Phase 2) — gives investors legal claim on the asset

Note: SPVs may be introduced in Phase 3 for very large properties (N500M+) or if SEC regulation requires it. For launch and growth, contractual agreements + Paystack split payments provide sufficient legal and financial structure.

PART 2: COMPANY PHASES & ORG STRUCTURE

Phase 0: Pre-Launch (Month 1-3)

Just you. Building the MVP. No revenue. No team.

What you do:

- Build the MVP (mobile app + web dashboard)
- Integrate Paystack DVA + Transfers
- Build investor onboarding flow with KYC
- Build property listing system
- Build payout calculation engine
- Build P2P marketplace
- Set up company (CAC, TIN, SCUML)
- Start conversations with developer partners

Costs:

Item	Cost
CAC Registration	N100,000 - N200,000
Domain + Hosting	N20,000 - N50,000/year
Securities Lawyer Consultation	N200,000 - N500,000
Your living expenses	Your savings
Total	N320,000 - N750,000

Revenue: N0

Milestone to move to Phase 1: MVP is built and at least one developer partner has agreed to list a property.

Phase 1: Launch (Month 3-6)

You + co-founder. First property. First investors.

External (paid per-job):

- Lawyer: contracts and agreements (N50K-100K per developer partnership)
- Accountant: Quarterly reconciliation (N50K-100K per quarter)

Costs:

Item	Cost/Month
Hosting + services	N15,000 - N30,000
Paystack fees	Covered by platform fee revenue
Lawyer (per developer agreement)	N50,000 - N100,000 one-time
Accountant	N50,000 per quarter
Misc (transport, data, meetings)	N30,000 - N50,000
Monthly burn	~N50,000 - N100,000

Revenue (from first property, e.g., N90M duplex):

Source	Amount
Platform fee (2% of N90M)	N1,800,000
Management fee (10% of quarterly rent)	N105,000/quarter
Year 1 total	~N2,200,000

Milestone to move to Phase 2: First property fully funded OR 2+ developer partners signed.

Phase 2: First Revenue (Month 6-18)

First hires. 2-5 properties. 1,000-3,000 investors.

New hire: Operations Associate

- Handles daily investor support
- Processes KYC verifications
- Monitors transactions
- Coordinates payouts
- Salary: N150,000 - N250,000/month

Costs:

Item	Cost/Month
Operations Associate salary	N150,000 - N250,000
Hosting + services	N30,000 - N50,000
Lawyer retainer	N50,000 - N100,000
Accountant retainer	N50,000 - N100,000
Office / co-working (optional)	N50,000 - N100,000
Misc	N50,000
Monthly burn	N380,000 - N650,000

Revenue (5 properties averaging N60M each):

Source	Amount
Platform fees (2% of N300M)	N6,000,000
Management fees (10% of annual rent)	N1,500,000/year
P2P trading fees	N200,000 - N500,000/year
Year total	~N8,000,000

Hiring trigger for Phase 3: Monthly revenue consistently above N1,000,000 for 3+ months.

Phase 3: Growth (Month 18-36)

Departments forming. 5-20 properties. 3,000-10,000 investors.

New hires:

Role	Salary/Month	Why
Software Developer	N300,000 - N500,000	You can't build + run the business alone
Finance Officer	N200,000 - N350,000	Multiple properties, tax filings, reconciliation
Customer Support Agent	N100,000 - N180,000	3,000+ investors = too many queries

Role	Salary/Month	Why
Developer Relations Manager	N200,000 - N350,000	Managing 10+ developer partners

Monthly burn: N1,500,000 - N2,500,000
Monthly revenue target: N3,000,000 - N5,000,000

Phase 4: Scale (Month 36+)

Full company. 20-80+ properties. 10,000+ investors.

Total team: 15-25 people
Monthly burn: N5,000,000 - N12,000,000
Monthly revenue: N15,000,000 - N30,000,000+

PART 3: ROLES & RESPONSIBILITIES (DETAILED)

3.1 CEO / Technical Co-Founder (You)

Title: Chief Executive Officer / Co-Founder

Reports to: Board of Directors

Phase: From Day 0

Responsibilities:

- Set company vision, strategy, and direction
- Build and maintain the platform (Phase 0-2), then oversee tech team
- Pitch to and sign developer partners
- Pitch to investors (if raising external funding)
- Make final product decisions (features, roadmap, UX)
- Manage Paystack integration, API architecture, database
- Approve quarterly payouts before they're triggered
- Represent the company publicly
- Manage company finances (Phase 0-1), then oversee CFO
- Set hiring priorities and make final hiring decisions
- Approve new property listings on the platform

Skills: Full-stack development, business development, leadership, financial literacy

Compensation:

- Phase 0-1: N0 salary (equity only)
- Phase 2: N200,000 - N400,000/month (when revenue allows)
- Phase 3+: N500,000 - N1,000,000/month
- Equity: 60% (vesting over 4 years)

3.2 COO / Operations Co-Founder

Title: Chief Operating Officer / Co-Founder

Reports to: CEO

Phase: From Phase 1 (Launch)

Responsibilities:

- Run day-to-day operations of the company

- Investor support — answer questions, resolve issues (WhatsApp, email, calls)
- Review and approve KYC verifications (flagged accounts)
- Coordinate with developer partners: chase rent payments, collect documents, maintain relationships
- Coordinate with lawyer on contracts and agreements
- Payout coordination — verify rent received, confirm calculations, authorize disbursement
- Manage operations team as it grows
- Create and maintain operations processes and SOPs (Standard Operating Procedures)
- Handle disputes between investors, or between investors and developers
- Monitor platform transactions for unusual activity
- Manage relationships with external partners (Paystack, lawyer, accountant)
- Oversee customer support team (Phase 3+)

Skills: Organization, communication, patience, attention to detail, basic finance, people management

Compensation:

- Phase 1: N0 salary (equity only)
 - Phase 2: N150,000 - N300,000/month (when revenue allows)
 - Phase 3+: N400,000 - N800,000/month
 - Equity: 40% (vesting over 4 years with 6-month cliff)
-

3.3 Operations Associate

Title: Operations Associate

Reports to: COO

Phase: First hire — Phase 2

Responsibilities:

- Handle Tier 1 investor support (common questions, how-to, status updates)
- Process daily KYC verifications — review bank account matches
- Monitor incoming investments — verify payments matched to correct units
- Update investor records and property records
- Prepare quarterly payout data for COO review
- Follow up with developer partners on rent collection dates
- Maintain FAQ document and support templates
- Flag unusual transactions or issues to COO
- Manage investor WhatsApp groups/communities

Skills: Customer service, basic computer skills, organized, patient, good communicator

Salary: N150,000 - N250,000/month

When to hire: When you have 500+ investors or 2+ properties and investor queries take more than 3 hours/day

3.4 Finance & Accounts Officer

Title: Finance & Accounts Officer

Reports to: CEO (Phase 2-3), then CFO (Phase 4)

Phase: Phase 3

Responsibilities:

- Maintain books for PropVest Ltd and all property accounts
- Monthly reconciliation of all Paystack sub-accounts and platform revenue
- Calculate quarterly payouts and prepare payout reports
- Prepare monthly financial statements (P&L, balance sheet, cash flow)
- Handle tax filings — CIT, VAT, WHT returns
- Process payroll for employees
- Track revenue by property, by month
- Prepare financial reports for CEO and Board
- Coordinate with external auditors (annual audit)
- Monitor Paystack settlements and reconcile with bank records
- Budget tracking and expense management

Skills: Accounting (OND/HND/BSc in Accounting minimum), knowledge of Nigerian tax law, Excel proficiency, experience with accounting software

Salary: N200,000 - N350,000/month

When to hire: When you have 5+ properties or managing more than N500M in assets

3.5 Legal Officer / Company Secretary

Title: Legal Officer & Company Secretary

Reports to: CEO

Phase: Phase 3-4 (use external lawyer before this)

Responsibilities:

- Oversee legal documentation for new property listings
- Draft and review all legal agreements (investor terms, developer partnerships, employment contracts)
- Ensure regulatory compliance — SEC, SCUML, NDPA
- Act as Company Secretary — maintain statutory records, file annual returns at CAC
- Handle legal disputes, demand letters, and litigation coordination
- Review property documents (C of O, Governor's Consent) before listing
- Advise CEO on legal risks and regulatory changes
- Coordinate with external law firm on complex matters
- Maintain contract register — track all agreements, expiry dates, renewal dates

Skills: Law degree (BL), 3+ years experience, knowledge of Nigerian corporate/property/securities law

Salary: N300,000 - N500,000/month

When to hire: When legal costs exceed N200,000/month consistently, or when you have 10+ active properties

3.6 Developer Relations Manager

Title: Developer Relations Manager

Reports to: COO

Phase: Phase 3

Responsibilities:

- Manage relationships with all developer partners (Dan Mama, Saleem Goje, etc.)
- Onboard new developer partners — walk them through the process, set up their branded pages
- Monthly check-ins with each developer partner
- Collect property documentation for new listings
- Track rent collection dates and follow up with developers
- Report developer partner feedback to product team (you)
- Coordinate property inspections and valuations
- Resolve issues between developers and the platform
- Identify and pitch new developer partners

- Maintain developer partner database (properties, contacts, history)

Skills: Relationship management, real estate knowledge, professional communication, organization

Salary: N200,000 - N350,000/month

When to hire: When you have 5+ developer partners and relationship management takes more than 2 hours/day

3.7 Customer Support Agent

Title: Customer Support Agent

Reports to: COO → Operations Associate

Phase: Phase 3

Responsibilities:

- Answer investor questions via in-app chat, WhatsApp, email
- Guide new investors through signup and KYC process
- Resolve common issues (payment not reflecting, payout questions, unit transfer help)
- Escalate complex issues to Operations Associate or COO
- Maintain and update FAQs and help documentation
- Track common complaints and report patterns to product team
- Follow up with investors who started KYC but didn't complete

Skills: Excellent written communication, patience, empathy, basic tech literacy

Salary: N100,000 - N180,000/month

When to hire: When support queries exceed 50/day

3.8 Software Developer (2nd)

Title: Software Developer

Reports to: CEO (you)

Phase: Phase 3

Responsibilities:

- Build new features based on product roadmap
- Fix bugs and handle technical issues
- Maintain and optimize backend (APIs, database, payout engine)
- Implement security updates and patches
- Build admin tools and reporting dashboards
- Handle Paystack integration updates
- Write tests and maintain code quality
- On-call for technical emergencies

Skills: React Native, Next.js, Node.js, PostgreSQL/MongoDB, REST APIs, Paystack API experience is a bonus

Salary: N300,000 - N500,000/month

When to hire: When you're spending more time on maintenance/bugs than on business growth, or when feature requests are piling up

3.9 Marketing & Content Lead

Title: Marketing & Content Lead

Reports to: CEO

Phase: Phase 3-4

Responsibilities:

- Create content for PropVest social media (Instagram, Twitter, LinkedIn)
- NOT marketing properties — developers do that. Marketing the PLATFORM to new developers and educating potential investors
- Write blog posts, guides, and educational content about real estate investment
- Manage PropVest's own social media accounts
- Create marketing materials for developer partners (templates, guidelines)
- Run campaigns to attract new developer partners
- PR and media relationships
- Track and report marketing metrics

Skills: Content creation, social media management, copywriting, basic graphic design (Canva)

Salary: N150,000 - N300,000/month

When to hire: Phase 3-4, after product-market fit is proven. Not a priority at launch.

3.10 Compliance Officer

Title: Compliance Officer

Reports to: CEO → Legal Officer

Phase: Phase 4

Responsibilities:

- Monitor all transactions for suspicious activity (AML/CFT compliance)
- File Suspicious Transaction Reports (STRs) with NFIU when required
- Conduct periodic KYC reviews and update investor records
- Ensure ongoing compliance with SEC, NDPA, SCUML regulations
- Conduct internal audits of processes and controls
- Train staff on compliance procedures
- Maintain compliance documentation and records
- Coordinate with regulators during examinations

Skills: Compliance/AML certification, knowledge of Nigerian financial regulations, audit experience

Salary: N300,000 - N500,000/month

When to hire: Phase 4, or when regulatory bodies require you to have one

PART 4: CO-FOUNDER AGREEMENT

Put this in writing BEFORE you start working together. Non-negotiable.

4.1 Recommended Equity Split

Person	Equity	Why
You (CEO/CTO)	60%	Brought the idea, building the entire platform, leading business development

Person	Equity	Why
Co-founder (COO)	40%	Running operations, equal commitment going forward

4.2 Vesting Schedule

Both founders' equity should vest over **4 years with a 6-month cliff**.

What this means:

- **Month 0-6:** Neither founder has "earned" any equity yet
- **Month 6 (cliff):** Each founder earns 12.5% of their allocation at once
- **Month 7-48:** The remaining equity vests monthly (about 2.1% of allocation per month)

Example for co-founder (40% total):

Time	Equity Earned	Total Vested
Month 0-5	0%	0%
Month 6 (cliff)	5%	5%
Month 12	5%	10%
Month 24	10%	20%
Month 36	10%	30%
Month 48	10%	40%

Why vesting matters: If your co-founder leaves after 3 months, they walk away with 0% (cliff not reached). Without vesting, they'd walk away with 40% of the company for 3 months of work.

4.3 Key Terms to Include

Decision-making authority:

- Product/technology decisions: CEO has final say
- Operations decisions: COO has final say
- Financial decisions above N500,000: Both must agree
- Hiring/firing: Both must agree
- New property listings: Both must agree
- Equity changes, fundraising, selling the company: Both must agree (these are "reserved matters")

What happens if one founder leaves:

- Before cliff (6 months): Departing founder forfeits all unvested equity
- After cliff: Departing founder keeps vested equity, forfeits unvested
- Company has the right to buy back vested shares at fair market value
- 90-day non-compete after departure

Intellectual property:

- All code, designs, brand assets, and business processes created for PropVest belong to PropVest Ltd, not to any individual founder
- This is critical — if you split up, the company keeps the platform you built

Salary:

- No salary in Phase 0-1 (both working for equity)
- When revenue allows, both founders can draw salary — agreed upon by both
- Salary caps until the company is profitable (e.g., max N300,000/month each until profitability)

Deadlock resolution:

- If you disagree and can't resolve it, CEO has the deciding vote on operational matters (since 60% equity holder)
- For reserved matters (fundraising, selling company), deadlock goes to a mutually agreed advisor or mediator

4.4 Documents to Sign

Get a lawyer to draft these (budget N100,000 - N200,000):

1. **Co-Founder Agreement** — covers everything above
2. **Share Subscription Agreement** — formalizes equity ownership
3. **IP Assignment Agreement** — any prior work on PropVest (your code, designs, scripts) gets formally assigned to the company
4. **Vesting Agreement** — details the vesting schedule and cliff

PART 5: FINANCIAL MANAGEMENT

5.1 Bank Accounts You Need

Account	Purpose	When
PropVest Ltd current account	Company operating expenses, salaries, platform revenue	Day 1
PropVest Ltd savings/investment account	Reserve fund, emergency fund	When revenue allows
Paystack settlement account	Where Paystack settles your 3% platform fee (auto-split from every investment)	Linked to PropVest Ltd account
PropVest payout float account	Fund this account to run Paystack Transfers for investor payouts	When first payout is due

Important: PropVest never holds investor or developer money. Paystack Split Payments automatically routes 97% to the developer's own bank account and 3% to PropVest's account. Investor money goes straight to the developer. For payouts, the developer sends the distributable rent amount to PropVest's payout account, and PropVest distributes to investors via Paystack Transfers.

Developer's own bank account — each developer partner uses their own existing business bank account. PropVest creates a Paystack Sub-account linked to it. No new accounts needed.

5.2 Basic Bookkeeping

Even before you hire an accountant, track these:

Income tracking (per month):

- Platform fees collected (per property)
- Management fees collected (per property, per quarter)
- P2P trading fees collected
- Total revenue

Expense tracking (per month):

- Paystack fees (collections + transfers)
- Hosting and infrastructure
- Legal fees
- Salaries (when applicable)
- KYC verification costs
- Transport, data, misc
- Total expenses

Per property tracking:

- Total raised
- Units sold / unsold
- Rent received (date and amount)
- Payouts distributed (date and amount)
- Paystack sub-account balance / total collected
- Platform fee collected
- Management fee collected

Use a simple spreadsheet initially. Move to accounting software (Wave, Zoho Books, or QuickBooks) when you have 3+ properties.

5.3 Tax Calendar

Month	Obligation
21st of every month	VAT return and payment for previous month
10th of every month	PAYE remittance for employees
Within 6 months of year-end	Company Income Tax filing
Within 18 months of incorporation	First annual return at CAC
Every 12 months after	Annual return at CAC (N5,000 - N20,000)
Quarterly	WHT remittance (if applicable)

5.4 Revenue Distribution Flow

When money comes in, this is exactly how it should flow:

INVESTMENT FLOW (Paystack Split Payment):

Investor pays N100,000 for 1 unit

■

■■■ Paystack takes N300 (DVA fee, deducted from total)

■

■■■ Paystack auto-splits the remaining N99,700:

■

■

■ ■■■ 97% → N96,709 → Developer's own bank account (instant)

■ ■ ■■■ Developer sees this in their bank app

■

■

■ ■■■ 3% → N2,991 → PropVest's Paystack settlement account

■ ■■■ This is YOUR revenue (platform fee)

■

- PropVest backend records: Investor X owns 1 unit in Property Y
- No money sits with PropVest. Trust is automatic.

PAYOUT FLOW (Quarterly Rent Distribution):

Developer collects rent from tenant: N4,200,000/year → N1,050,000/quarter

- Developer reports rent on PropVest Developer Portal
- ■■■ Uploads proof (bank statement, receipt)
- Platform calculates each investor's share
- ■■■ 900 investors × their units × share per unit
- Management fee (10%): N105,000 → kept by PropVest
- ■■■ This is YOUR revenue
- Distributable: N945,000
- Developer transfers N945,000 to PropVest's payout float account
- ■■■ Developer only sends the investor portion, not PropVest's fee
- PropVest triggers Paystack Bulk Transfer: 900 payments
- ■■■ Paystack transfer fees: ~N45,000 (N50/tx × 900, from PropVest)
- Investors receive rent in their bank accounts
- ■■■ Each investor gets: (their units / total units) × N945,000

PART 6: GOVERNANCE & DECISION-MAKING

6.1 Board of Directors

At launch (Phase 0-2):

- Just you and co-founder. You ARE the board.
- Minimum 2 directors required by CAC for a Ltd company.

Phase 3+:

- Add 1-2 independent advisors to the board
- They attend quarterly board meetings
- Provide guidance on strategy, legal, finance
- Don't need to be paid much — N50,000 per meeting or advisory shares (0.5-1%)

If you raise investment:

- Investor may want a board seat — this is normal
- Keep the board small: 3-5 people maximum
- You should always maintain board majority or at minimum equal representation

6.2 Meeting Cadence

Meeting	Who	Frequency	Purpose
Daily standup	You + co-founder	Daily (15 min)	What are you working on today? Any blockers?
Weekly review	You + co-founder + team	Weekly (1 hour)	Review metrics, investor queries, property updates, issues
Monthly financials	You + co-founder + accountant	Monthly (1 hour)	Revenue, expenses, bank balances, tax obligations
Quarterly board	All directors + advisors	Quarterly (2 hours)	Strategy, performance review, major decisions
Quarterly payout review	You + co-founder + accountant	Before each payout	Verify calculations, approve disbursement

6.3 Decision-Making Framework

Decision Type	Who Decides	Examples
Day-to-day operations	COO	Investor support issues, scheduling, minor disputes
Technical / product	CEO	Features, bug priorities, architecture, integrations
New property listing	Both agree	Due diligence must pass, both sign off
Hiring	Both agree	Both interview, both approve
Spending under N100K	Either founder	Office supplies, software subscriptions, transport
Spending N100K - N500K	Both agree	New hire, legal engagement, marketing campaign

Decision Type	Who Decides	Examples
Spending above N500K	Board approval	Major investment, office lease, equipment
Fundraising	Board approval	Any equity sale, loan, or investment round
Partnerships	CEO leads, COO approves	Developer partnerships, API partnerships

PART 7: OPERATIONS MANUAL

7.1 Investor Onboarding Flow

Step 1: Investor downloads app / visits website
 Step 2: Signs up with email + phone number
 Step 3: OTP sent to phone → verified
 Step 4: Investor enters full name + bank account + bank name
 Step 5: Backend calls Paystack Resolve Account → matches name
 Step 6: If match → Tier 1 verified (can invest up to N500,000)
 Step 7: Investor browses properties
 Step 8: Investor selects property → selects number of units
 Step 9: App shows Paystack DVA account number → investor transfers
 Step 10: Webhook received → units allocated → investor notified
 Step 11: Investor sees units in portfolio

What operations team does:

- Monitor daily signups (dashboard)
- Review any KYC flags (name mismatch, suspicious accounts)
- Follow up with investors who started but didn't complete KYC
- Answer questions from new investors

7.2 Property Listing Process

Step 1: Developer partner approaches PropVest (or you approach them)
 Step 2: You meet → discuss which property to list
 Step 3: Developer provides:

- Property documents (C of O, Governor's Consent, building plans)
- Property photos and description

- Property valuation (independent or agreed upon)
 - Rental income history (if rental) or projected sale price (if build & sell)
 - Developer's ID and company documents
- Step 4: Legal review → lawyer verifies property documents
- Step 5: CEO and COO approve the listing → both sign off
- Step 6: Developer provides their bank account details
- Step 7: PropVest creates Paystack Sub-account for this property (API call, instant)
- Step 8: Paystack DVA generated for the property (investors will pay to this account)
- Step 9: Developer signs Partnership Agreement (legal contract)
- Step 10: Developer branded page built on platform
- Step 11: Unit price and total units calculated
- Step 12: Property goes live on the platform
- Step 13: Developer posts the link on their Instagram/social media
- Step 14: Monitor unit sales daily – developer sees money arriving in their own bank account

Timeline: Steps 3-10 should take 2-4 weeks.

Checklist for approval:

- ☐ C of O or Governor's Consent verified
- ☐ Property physically inspected
- ☐ Valuation confirmed (within 10% of market)
- ☐ Developer background check passed (no fraud history, established reputation)
- ☐ Paystack Sub-account created (linked to developer's bank)
- ☐ DVA generated for the property
- ☐ Legal agreements signed (Developer Partnership Agreement, Investment Terms)
- ☐ Property listed on platform and tested
- ☐ Both founders approve

7.3 Quarterly Payout Process (Rental Properties)

Week 1 of quarter:

- Step 1: COO checks if developer has collected rent from tenant
- Step 2: If not received → COO contacts developer partner → chase the rent
- Step 3: Developer reports rent on Developer Portal and uploads proof

Week 2:

- Step 4: System calculates each investor's share automatically
- Step 5: Finance officer (or COO in early phase) reviews the calculation
- Step 6: Reconciliation: total payouts + management fee = total rent received
- Step 7: CEO reviews and approves the payout batch

Week 2-3:

- Step 8: Developer transfers distributable amount (rent minus management fee) to PropVest's payout flow
- Step 9: PropVest triggers Paystack Bulk Transfer API
- Step 10: Monitor transfer status – check for failures
- Step 11: Retry any failed transfers (wrong account number, etc.)
- Step 12: Send notification to all investors: "Your quarterly payout has been sent"

Week 3-4:

- Step 13: Reconcile: PropVest payout account balance should be zero after distribution

Step 14: Archive payout report

Step 15: Management fee already in PropVest Ltd account (deducted before developer transfer)

7.4 P2P Trade Process

Step 1: Seller lists units on marketplace (sets price per unit)

Step 2: Buyer browses marketplace, finds listing

Step 3: Buyer taps "Buy" → system creates pending order

Step 4: Buyer receives Paystack DVA payment details → transfers

Step 5: Webhook confirms payment → system processes:

- Deducts trading fee (1-2%)
- Initiates Paystack Transfer to seller's bank account
- Transfers unit ownership from seller to buyer

Step 6: Both buyer and seller receive confirmation notifications

Step 7: Seller receives funds in bank account

What operations team monitors:

- Failed payments or transfers
- Disputes (buyer says they paid but units not received)
- Suspicious trading patterns (same person buying and selling repeatedly)

7.5 Dispute Resolution Process

Level 1: Customer support handles (minor issues)

- Payment not reflecting → check Paystack dashboard → resolve
- Wrong unit count → verify and correct
- App not working → escalate to tech (CEO)

Level 2: COO handles (moderate issues)

- Investor wants refund but units already allocated
- Developer hasn't paid rent on time
- Name mismatch during KYC
- P2P trade dispute

Level 3: CEO + COO handle together (serious issues)

- Fraud allegation
- Developer default (can't pay rent, project failed)
- Legal threat from investor
- Regulatory inquiry

Level 4: External lawyer handles

- Actual legal disputes
- Court proceedings
- Regulatory enforcement actions

7.6 Developer Partner Onboarding

Step 1: Initial meeting → explain PropVest, show pitch deck

Step 2: Developer interested → sign Letter of Intent (non-binding)

Step 3: Due diligence period (1-2 weeks):

- Verify developer's CAC registration
- Check developer's track record (completed projects, reputation)
- Verify property documents
- Property inspection

Step 4: Negotiate terms (which property, how many units, developer's retained stake)

Step 5: Legal agreements signed:

- Developer Partnership Agreement
- Property Management Agreement (for rental properties)

Step 6: Create Paystack Sub-account linked to developer's bank account (instant via API)

Step 7: Build developer's branded page on platform

Step 8: Training session – show developer how to use their dashboard

Step 9: Go live – developer posts on social media

Step 10: Weekly check-ins for the first month

Step 11: Monthly check-ins thereafter

PART 8: LEGAL & COMPLIANCE CHECKLIST

8.1 Registrations Needed

Registration	Body	Cost	When
Company incorporation	CAC	N100,000 - N200,000	Before anything else
Tax Identification (TIN)	FIRS	Free	Immediately after CAC
VAT registration	FIRS	Free	When turnover approaches N25M
SCUML certificate	CBN/EFCC	Free	Before opening bank accounts
SEC registration (if required)	SEC	Varies	After legal consultation
NDPA registration	NDPC	Varies	Before collecting personal data
Per-property SPV (Phase 3, if needed)	CAC	N100,000 - N200,000 each	Only for large properties or regulatory requirement

8.2 Contracts/Agreements Needed

Document	Between	Purpose
Co-Founder Agreement	You + Co-founder	Equity, roles, vesting, exit terms
Terms of Service	PropVest + Investors	Legal terms for using the platform
Privacy Policy	PropVest + Users	How you handle personal data (NDPA requirement)
Investment Terms	PropVest + Investors	Risk disclosures, returns are not guaranteed, unit ownership terms
Developer Partnership Agreement	PropVest + Developer	Terms of listing properties, responsibilities, revenue sharing
Investment Certificate Agreement	PropVest + Investors (per property)	Unit ownership rights, return entitlement, exit mechanisms
Property Management Agreement	PropVest + Developer	Developer's obligation to manage property, collect rent, maintain, and transfer payout funds
Employment Contract	PropVest + Employees	Terms of employment, NDA, non-compete
NDA (Non-Disclosure Agreement)	PropVest + Anyone you share sensitive info with	Protect business secrets

8.3 Ongoing Compliance

Obligation	Frequency	Responsible
CAC Annual Return	Yearly	Legal Officer / Company Secretary
VAT filing and payment	Monthly (21st)	Finance Officer
CIT filing	Annually	Finance Officer + Auditor
PAYE remittance	Monthly (10th)	Finance Officer
NDPA data audit	Annually	Data Protection Officer
Per-property financial reports	Quarterly + Annual	Finance Officer

Obligation	Frequency	Responsible
AML transaction monitoring	Ongoing	Compliance Officer / COO
Property insurance renewal	Annually	COO
Investor communication	Quarterly (minimum)	COO

PART 9: RISK MANAGEMENT

9.1 Key Risks and Mitigation

Risk	Severity	Likelihood	Mitigation
Developer partner defaults (can't pay rent, project abandoned)	High	Medium	Due diligence before listing. Developer retains stake (skin in the game). Legal agreements with penalties. Diversify across multiple developers.
Regulatory shutdown (SEC or CBN orders you to stop)	High	Low-Medium	Engage SEC early. Get legal opinion. Structure properly. Maintain good records.
Cybersecurity breach (investor data stolen)	High	Low	Encrypt all data. Use HTTPS. Secure API keys. Regular security audits. Two-factor auth.
Paystack service disruption	Medium	Low	Have backup payment processor identified. Keep manual payout process documented.

Risk	Severity	Likelihood	Mitigation
Co-founder dispute	High	Medium	Written co-founder agreement. Vesting schedule. Clear decision-making framework.
Property value drops	Medium	Low	Disclose investment risks clearly. Diversify across property types and locations.
Tenant default (rent not paid)	Medium	Medium	This is the developer's problem to manage. Disclose risk to investors. Build 1-month rent reserve per property.
Slow investor adoption	Medium	Medium	Start with developers who have large, engaged followings. One successful property builds trust.
Fraud (fake investors or fake developers)	High	Low	BVN/NIN verification. Developer due diligence. Transaction monitoring.

9.2 Insurance

Insurance Type	What it Covers	When to Get
Professional Indemnity Insurance	Claims against PropVest for errors in service	Phase 2 (when managing significant investor funds)
Directors & Officers Insurance	Personal liability of directors for company decisions	Phase 3
Cyber Insurance	Data breach costs, ransomware, business interruption	Phase 3
Property Insurance (per property)	Fire, flood, structural damage to listed properties	Per property — developer should already have this

9.3 Emergency Procedures

If Paystack goes down:

1. Notify investors via app/SMS that payouts are delayed
2. Contact Paystack support immediately
3. If prolonged (24+ hours), prepare manual bank transfers as backup
4. Resume automated payouts when Paystack is back

If your server goes down:

1. Hosting provider handles most outages automatically
2. If prolonged, switch to backup/standby server
3. Database backups should be restorable within 1 hour
4. Communicate to investors via SMS/WhatsApp (since app is down)

If a developer partner is accused of fraud:

1. Immediately freeze the property listing (no new investments)
2. Investigate the allegation
3. Communicate transparently with affected investors
4. Engage lawyer
5. If confirmed, work with law enforcement and protect investor interests through legal agreements

If a data breach occurs:

1. Identify what data was compromised
2. Secure the vulnerability immediately
3. Notify NDPC within 72 hours (legal requirement)
4. Notify affected investors
5. Engage cybersecurity expert
6. Offer remediation (e.g., monitor affected accounts)

PART 10: GROWTH TRIGGERS

When to make key decisions based on metrics, not feelings.

10.1 Hiring Triggers

Metric	Threshold	Action
Investor support queries	50+ per day	Hire Customer Support Agent
Properties listed	5+ active	Hire Operations Associate (if not already)
Developer partners	5+ active	Hire Developer Relations Manager
Monthly revenue	N1,000,000+ for 3 months	Hire Finance Officer
Bug reports + feature requests	CEO spending 60%+ time on code	Hire 2nd Developer
Regulatory complexity	SEC registration required	Hire Legal Officer
Total assets managed	N1 billion+	Hire Compliance Officer
Brand awareness needed	Product-market fit confirmed	Hire Marketing Lead

10.2 Infrastructure Triggers

Metric	Threshold	Action
Concurrent users	1,000+	Upgrade hosting, add load balancing
Total investors	5,000+	Dedicated database server
Properties	20+	Automated payout system (remove manual approval)
P2P trades per day	100+	Dedicated marketplace infrastructure
Data volume	Growing fast	Implement data archiving strategy

10.3 Business Milestones

Milestone	What Changes
First property fully funded	Proof of concept. Start signing next developer partners aggressively.

Milestone	What Changes
First quarterly payout completed	Proof the full cycle works. Use this for marketing/PR.
N500M total assets managed	You're a real company now. Consider SEC registration, advisory board, office space.
N1B total assets managed	Consider raising external investment for growth. Hire C-level executives.
10,000 investors	You need proper customer support infrastructure, not just WhatsApp.
50 properties	Automated systems must handle most operations. Manual processes won't scale.
First year profitable	Pay yourselves proper salaries. Build 6-month operating expense reserve.

QUICK REFERENCE: YEAR 1 CHECKLIST

Print this. Tick them off as you go.

Month 1:

- ☐ Register PropVest Ltd at CAC
- ☐ Get TIN from FIRS
- ☐ Get SCUML certificate
- ☐ Open corporate bank account
- ☐ Consult securities lawyer about SEC requirements
- ☐ Start building MVP

Month 2:

- ☐ Continue building MVP
- ☐ Draft co-founder agreement with lawyer
- ☐ Sign co-founder agreement
- ☐ Start conversations with first developer partner
- ☐ Register domain, set up hosting

Month 3:

- ☐ MVP ready for testing

- ☐ First developer partner committed
- ☐ Set up Paystack account (DVA + Transfers)
- ☐ Draft Terms of Service and Privacy Policy
- ☐ Create Paystack Sub-account for first developer partner
- ☐ Generate DVA for first property

Month 4:

- ☐ Launch platform with first property
- ☐ Developer posts link on Instagram
- ☐ Monitor first investments coming in
- ☐ Handle first investor KYC verifications
- ☐ Set up investor WhatsApp community

Month 5-6:

- ☐ First property approaching full funding
- ☐ Sign second developer partner
- ☐ Set up Paystack Sub-account for second property
- ☐ Start planning first quarterly payout

Month 7-9:

- ☐ First quarterly payout distributed successfully
- ☐ Use payout success as proof for PR/marketing
- ☐ 2-3 properties live
- ☐ Consider first hire (Operations Associate)
- ☐ First VAT filing with FIRS

Month 10-12:

- ☐ 3-5 properties live
- ☐ 1,000+ investors on platform
- ☐ Monthly revenue covering operating costs
- ☐ Hire Operations Associate
- ☐ Start accountant retainer
- ☐ Prepare first annual financial statements
- ☐ File first CAC annual return
- ☐ Review and update all processes based on Year 1 learnings
- ☐ Plan Year 2 roadmap

FINAL NOTES

Remember:

1. Start small. One property. One developer. Prove it works.
2. Don't hire until revenue forces you to. Every naira matters early on.
3. Put everything in writing. Co-founder agreements, developer contracts, investor terms. Everything.
4. Never hold developer or investor money. Paystack split payments handle the routing automatically.
5. Comply with regulations from day one. It's cheaper to do it right than to fix it later.
6. Communicate with investors even when there's nothing to report. Silence breeds distrust.
7. Your developer partners are your lifeblood. Treat them well. Their success is your success.
8. Build systems and processes, not just code. The company is the system, not just the app.
9. Save 6 months of operating expenses before spending on nice-to-haves.
10. You will make mistakes. Document them, learn from them, don't repeat them.

This document should be reviewed and updated every 6 months as the company evolves.
